Rising Grade 1

Sample Lesson

## LESSON 1

---

### Story Problem Lesson 1

Billy has 4 books in his book baggie. His teacher gives him 5 more books to put in his book baggie. How many books does Billy have in his book baggie now?

---

### Story Problem Basics

- Problem Type: Add To: Result Unknown
  - Equation:  $4 + 5 = ?$
  - Answer: 9 books
- 

### Launch Planning Guide

- Check for Meaning: Does Billy have more or less than 5 books in his book baggie?
  - Exemplar Response: Billy has more than 5 books in his book baggie, because he already has 4 books in his book baggie before his teacher gives him 5 more books, so he has to have more books than the number of books his teacher gives him.
